Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5-8, 32, 36, 38 and 41-47 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 36, at line 12, it is recited that the frame "comprises a that supports a top", it is not clear what structure is supposed to be recited at this point. It appears that applicant has left out subject matter. The claim, as presented, is incomplete.

Due to the incomplete nature of claim 36, the claim and it's dependents have not been rejected under prior art.

In claim 43, there is recited a "drinking cup filter assembly" but there is no positive recitation of a drinking cup or filter.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 43 is rejected under 35 U.S.C. 103(a) as being unpatentable over MacDonald in view of McKnight.

Art Unit: 1761

There is disclosed in MacDonald a beverage brewing and drinking cup filter assembly, comprising: a drinking cup A, having an open top; a frame B dimensioned to be received into the open top of the drinking cup, the frame having a filter hole (opening) passing therethrough, and wherein the frame also comprises a vertically extending filter support D; and a filter C supported by the filter support and positioned within the drinking cup.

McKnight discloses that it is known in the art to position a hole 38 beside a filter hole of a filter support frame of a beverage brewing and drinking cup filter assembly.

It would have been obvious to one skilled in the art to provide the frame B of MacDonald with the frame hole taught in McKnight, for the purpose of allowing a user to view the liquid level within the drinking cup.
